

## USEFUL INFORMATION

### Safety notice

Each booth must have its own certified fire extinguisher ready at the booth. Booths without a fire extinguisher can be closed immediately by the organizer! For those who have booked it, we remind you to bring 40 euros in cash for the deposit.

Additionally, no glass bottles are allowed on the whole festival area, please take care of alternatives. We ask you to prefer plastic cups, which can be disposed of in the appropriate containers on site.

### Water/Electricity access

Power boxes are found at regular intervals on the festival area. All exhibitors who need and have ordered access to electricity are responsible for bringing their own extension cords or cable drums, adapters, capable of spanning a length of around 30 meters. The power connections are generally intended for CEE plugs.

For connection to water, exhibitors must bring suitable hoses (one inch) with a length of 30 meters. We remind you not to use electric stoves or anything else that could interfere in the correct management and supply of electricity.

### Recycling

Please separate your waste into PLASTIC, PAPER, CARDBOARD AND GENERAL and leave them at the front of your booth every evening. (Bike tubes have to be disposed into the general waste daily). We also provide facilities for waste separating in the logistics area.

Further details on waste collection will be provided at the Expo accreditation. Please take your waste to the designated recycling area during set-up and dismantling, which will be active throughout the event.

### Delivery of extra supplies

Exhibitors are allowed to restock their booths, with giveaways, information material or equal, two hours before and one hour after the official opening hours of the expo. Please note that driving on the Expo Area with any motor vehicle is not possible during this time. The restocking must accordingly be done by foot.

### Barbecues on the Expo site

Open fires are not permitted anywhere on the Expo. This does not apply to gas-powered barbecues and cooking appliances that comply with the [UNI TR 11426](#) extract. Please note that inspections may be carried out and non-compliance with these guidelines may result in temporary booth closure.
